Git · GitHub · GitHub API

OPEN TO

- Internships
- Software jobs
- Freelance projects

EDUCATION

Kohat University of Science and Technology (KUST)
Bachelor's degree programme
Kohat, Khyber Pakhtunkhwa, Pakistan

PROFILE

I am a full stack software engineer from Kohat, Pakistan. I build websites, web apps and mobile apps with React, Node.js and Flutter. I like clean code, simple design and products that people enjoy using. I am looking for an internship, a software job or freelance work where I can learn fast and deliver real results.

FEATURED PROJECT

KASHI TECH — Personal Portfolio Website

React · Tailwind CSS · Framer Motion · GitHub API · Vite

- Shows my GitHub work **live**: repositories, weekly commits and tech stack, using the GitHub API.
- Works well on phone and computer, with dark and light themes.
- Quick search menu (Ctrl+K), smooth animations and a mobile menu.
- Custom gold-and-dark design, plus a contact form where clients choose service, budget and timeline.

WHAT I CAN BUILD FOR YOU

Web Applications
Complete products, from database to screen.

Websites
Fast, clean and easy to use on any device.

REST APIs
Clear and reliable backends with Node.js.

Mobile Apps
Android and iOS apps built with Flutter.

Database Design
Simple, well-organised data structure.

System Upgrades
Improve and modernise existing systems.

WHY WORK WITH ME

- **Clear communication.** I explain things in simple words and share progress often.
- **Clean code.** My code is easy for other developers to read and maintain.
- **Fast learner.** I pick up new tools quickly and finish what I start.

Let's build something great together — **kashifmehmoodtech17@gmail.com**
